ANALYTIC SUBJECT INDEX

Bäcklund transformations (see *Integrable equations*) 154 (1989) 467
Bethe lattice (see *Three-component system*) 154 (1989) 521
Blume–Emery–Griffiths model (see *Lattice spin models*) 154 (1989) 365
Bond disorder
– Crossover dynamics in—ed lattices - van Velzen et al. 154 (1988) 34
Boundary corrections (see *Triezenberg–Zwanzig surface tension*) 154 (1988) 183
Brownian motion
– —in a medium with inhomogeneous temperature - Widder and Titulaer 154 (1988) 452

Cayley tree (see *Ising model, spin 1/2*) 154 (1988) 21
Chemical reacting systems (see *Minimum entropy production*) 154 (1988) 207
Corner transfer matrices
– —for the Ising model - Davies 154 (1988) 1
Critical points characterization
– —using probability distributions. II. Phase transition of liquid binary mixtures - Güémez et al. 154 (1988) 511
Critical slowing down, elimination of
– Simulation of a critical state without critical slowing down by a renormalization group multi-grid method - Hahn and Streit 154 (1988) 108
Crossover dynamics (see *Disordered lattices*) 154 (1988) 34
Crystal lattice
– The theory of phonon-induced contributions to the spin–lattice coefficients for $4f^7$ ($^8S_{7/2}$) ions due to the orbit–lattice interaction linear in static deformations - Pastusiak 154 (1988) 307
Crystallization
– Ground state properties of the spinless Falicov–Kimball model:—and metal–insulator transitions off the hole–particle symmetry point - Jędrzejewski et al. 154 (1988) 529
Cumulant expansion (see *Markovian processes, non–*) 154 (1989) 421

Debye dielectric relaxation
– On generalizations of the Debye equation for dielectric relaxation - Restuccia and Kluitenberg 154 (1988) 157
Decay rate (see *Tunneling, incoherent*) 154 (1988) 61
Deformations, static
– The theory of phonon-induced contributions to the spin–lattice coefficients for $4f^7$ ($^8S_{7/2}$) ions due to the orbit–lattice interaction linear in static deformations - Pastusiak 154 (1988) 307
Dielectric relaxation
– On generalizations of the Debye equation for— - Restuccia and Kluitenberg 154 (1988) 157
Diffusion coefficient (see *Fluid in elongational flow*) 154 (1989) 257

Diffusion in inhomogeneous media
– Brownian motion in a medium with inhomogeneous temperature - Widder and Titulaer 154 (1988) 452
Disorder solutions (see *Lattice spin models*) 154 (1989) 365
Disordered lattices
– Crossover dynamics in bond— - van Velzen et al. 154 (1988) 34

Effective medium approximation (see *Disordered lattices*) 154 (1988) 34
Electrolyte, asymmetric
– Strong coupling solution of the asymmetric electrolyte problem: field-theoretic approach - Kholodenko and Beyerlein 154 (1988) 140
Elongational flow
– Renormalization of the diffusion coefficient in a fluid in— - Díaz-Guilera et al. 154 (1988) 257
Emulsions of spherical droplets
– The effective viscosity of suspensions and emulsions of spherical particles - Cichocki et al. 154 (1988) 233

Falicov–Kimball model
– Ground state properties of the spinless—: crystallization and metal–insulator transitions off the hole–particle symmetry point - Jędrzejewski et al. 154 (1988) 529
Fluctuations, hydrodynamical (see *State with temperature gradient*) 154 (1988) 89
Fluctuations (see *Fluid in elongational flow*) 154 (1989) 257
Fluid in elongational flow
– Renormalization of the diffusion coefficient in a— - Díaz-Guilera et al. 154 (1988) 257
Fluids near structured wall
– Theory of simple fluids near a structured surface - Boudh-Hir 154 (1988) 127
Fokker–Planck equation (see *Rayleigh gas*) 154 (1989) 271
$4f^7$ ($^8S_{7/2}$) ions
– The theory of phonon-induced contributions to the spin–lattice coefficients for—due to the orbit–lattice interaction linear in static deformations - Pastusiak 154 (1988) 307

Gels
– Elastic instabilities and phase coexistence of— - Sekimoto and Kawasaki 154 (1988) 384

Harry Dym equation
– Soliton structure versus singularity analysis: third-order completely integrable nonlinear differential equations in 1 + 1-dimensions - Fuchssteiner and Carillo 154 (1988) 467
Hole–particle symmetry point (see *Metal–insulator transitions*) 154 (1989) 529

Instabilities, elastic (see *Gels*) 154 (1989) 384
Integrable equations
– Soliton structure versus singularity analysis: third-order completely integrable nonlinear differential equations in 1 + 1-dimensions - Fuchssteiner and Carillo 154 (1988) 467
Irreversible processes (see *State with temperature gradient*) 154 (1988) 89
Ising model
– Corner transfer matrices for the— - Davies 154 (1988) 1
Ising model, spin 1
– Susceptibility divergence of the spin 1 Ising model on the Cayley tree - Frank 154 (1988) 21
Ising model, two-dimensional
– Partition function zeros for the two-dimensional Ising model VI - Stephenson 154 (1988) 324

Ising model, two-dimensional
– Partition function zeros for the two-dimensional Ising model VII - Stephenson 154 (1988) 344
Ising model (see *Lattice spin models*) 154 (1989) 365
Ising model (see *Three-component system*) 154 (1989) 521
Ising system, two-dimensional (see *Critical slowing down, elimination of*) 154 (1988) 108

Lattice spin models
– Disorder solutions of— - Batchelor and van Leeuwen 154 (1988) 365
Liquid binary mixtures (see *Critical points characterization*) 154 (1989) 511
LMBW-hierarchy
– (Infinite) boundary corrections for the LMBW-equations and the TZ-formula of surface tension in the presence of spontaneous symmetry breaking - Requardt and Wagner 154 (1988) 183

Markovian processes, non–
– Systems under colored noise: treatment by renormalized operator cumulant expansions - Der 154 (1988) 421
Metal–insulator transitions
– Ground state properties of the spinless Falicov–Kimball model: crystallization and—off the hole–particle symmetry point - Jędrzejewski et al. 154 (1988) 529
Metastable systems
– Incoherent tunneling at weak bias: strong quantum damping - Dekker 154 (1988) 61
Minimum entropy production
– Remarks on the validity of the theorem of— - Kondepudi 154 (1988) 204
– Deviations from—at steady states of reacting chemical systems arbitrarily close to equilibrium - Hunt et al. 154 (1988) 207
Monte Carlo method (see *Critical slowing down, elimination of*) 154 (1988) 108

Noise, colored
– Systems under colored noise: treatment by renormalized operator cumulant expansions - Der 154 (1988) 421

Orbit–lattice interaction (see *$4f^7$ ($^8S_{7/2}$) ions*) 154 (1989) 307

Partition function zeros
– —for the two-dimensional Ising model VI - Stephenson 154 (1988) 324
– —for the two-dimensional Ising model VII - Stephenson 154 (1988) 344
Phonon-induced contributions (see *$4f^7$ ($^8S_{7/2}$) ions*) 154 (1989) 307
Polarizable medium
– On generalizations of the Debye equation for dielectric relaxation - Restuccia and Kluitenberg 154 (1988) 157
Potts model (see *Lattice spin models*) 154 (1989) 365
Probability distributions (see *Critical points characterization*) 154 (1989) 511

Quantum damping
– Incoherent tunneling at weak bias: strong— - Dekker 154 (1988) 61

Rayleigh gas
– On the velocity relaxation of a—. IV. Remarks on the solution of the usual kinetic equation - Ferrari 154 (1988) 271
Relaxation, velocity (see *Rayleigh gas*) 154 (1989) 271

Sedimentation (see *Suspensions of spherical particles*) 154 (1989) 213
Self-diffusion (see *Suspensions of spherical particles*) 154 (1989) 213
Sine-Gordon Hamiltonian, double
– Quantum tunnelling in a double sine-Gordon system near the instability - Furuya and Caldeira 154 (1988) 289
Singularity analysis (see *Integrable equations*) 154 (1989) 467
Soliton structure (see *Integrable equations*) 154 (1989) 467
Spatial phase coexistence (see *Gels*) 154 (1989) 384
Spin–lattice coupling (see *$4f^7$ ($^8S_{7/2}$) ions*) 154 (1989) 307
Spontaneous symmetry breaking
– (Infinite) boundary corrections for the LMBW-equations and the TZ-formula of surface tension in the presence of— - Requardt and Wagner 154 (1988) 183
State with temperature gradient
– Hydrodynamical field fluctuations in a non-equilibrium quasi-stationary state due to a temperature gradient. I. General theory - Chmielowski et al. 154 (1988) 89
Strong coupling regime (see *Electrolyte, asymmetric*) 154 (1988) 140
Surface–fluid interaction (see *Fluids near structured wall*) 154 (1988) 127
Susceptibility (see *Ising model, spin 1*) 154 (1988) 21
Suspensions of spherical particles
– Sedimentation and self-diffusion in— - Cichocki and Felderhof 154 (1988) 213
– The effective viscosity of suspensions and emulsions of spherical particles - Cichocki et al. 154 (1988) 233

Thermodiffusion
– Brownian motion in a medium with inhomogeneous temperature - Widder and Titulaer 154 (1988) 452
Three-component system
– Exact two-phase coexistence surface for a three-component solution on a Bethe lattice - Huckaby et al. 154 (1988) 521
Triangular lattices, anisotropic (see *Ising model, two-dimensional*) 154 (1989) 324
Triangular lattices, anisotropic (see *Ising model, two-dimensional*) 154 (1989) 344
Triezenberg–Zwanzig surface tension
– (Infinite) boundary corrections for the LMBW-equations and the TZ-formula of surface tension in the presence of spontaneous symmetry breaking - Requardt and Wagner 154 (1988) 183
Tunneling, incoherent
– Incoherent tunneling at weak bias: strong quantum damping - Dekker 154 (1988) 61
Tunneling, quantum (see *Sine-Gordon Hamiltonian, double*) 154 (1989) 289

Velocity autocorrelation function (see *Disordered lattices*) 154 (1988) 34
Velocity relaxation
– On the— of a Rayleigh gas. IV. Remarks on the solution of the usual kinetic equation - Ferrari 154 (1988) 271
Viscosity (see *Suspensions of spherical particles*) 154 (1989) 233

WKB approximation (see *Sine-Gordon Hamiltonian, double*) 154 (1989) 289

Zero field splitting (see *Deformations, static*) 154 (1989) 307
